14.g4 This came as a bit of a surprise to me. It turned out that Mendonca was trying to prepare the f4-push, but the problem is that, in general, the rook is not placed all that well on e1 after the position opens up. Das kam für mich ein wenig überraschend. Es stellte sich heraus, dass Mendonca versuchte, den f4-Vorstoß vorzubereiten, aber das Problem ist, dass der Turm im Allgemeinen nicht so gut auf e1 platziert ist, nachdem sich die Stellung geöffnet hat.

Bd6, ..Ne7, and/or ...Qc7 (or ...Qb8), and White deciding whether to play Qe2, Re1 and/or castle early. I'm not sure that anyone knows which move orders are best for either side, since each move comes with a tradeoff.

9.Re1 Played in the great majority of games, with 9 Qe2 the next most popular.

[There's only one game with 9.h4!? , which tries to prevent Black's kingside expansion and potentially secure g5 for a piece, but this deserves more attention. Black has numerous interesting replies, but it's worth noting that Bxh4? *(9...Qb6; 9...a5)* 10.Nxh4 Qxh4 11.Nf3 gives White excellent play for a mere pawn, with space, the bishop pair, better minor pieces, and Black being permanently cramped.]

[9.dxc5 Ndxe5 is easy for Black when he hasn't made the weakening ... g5 move.]

[13...Kd8 14.0-0-0 Bf4+ 15.Kb1± was played in P.Darini - M.Antipov, Qingdao 2019 (0-1 in 78). I find this position pretty tough to assess, since Stockfish claims a white advantage despite the black bishop pair. Certainly White's play seems easier, based on b3 to create queenside targets. Bxg5!? 16.Nxg5 Qc5 17.Nf7+ Kc7 And now ...Nd7-b6 would win. 18.Nxh8 O.Abdulov - N. Abasov, Baku 2017 (0-1 in 39). Threatens to win with Rh1-e1. Ne5!?∞ 19.Rd5! 25.Rd2?

[25.c4!∞ An excellent idea which white failed to find. White will try to get his knight to d5 while fixing black's pawn on c5. C07: French Tarrasch: 3...c5, 4 Ngf3 and 4 exd5 Qxd5 Against the 3...c5 Tarrasch, White often employs 4 Ngf3 to avoid the 4 exd5 Qxd5 lines. This can make it difficult for Black to generate active play, but White's punishment is that his play is limited as well. I've used a game from two months ago as my basis for examining 4 Ngf3, which was actually used in 11 games this month. My main idea is to show some standard Black solutions, dull though some of them might be! **1.e4 e6 2.d4 d5 3.Nd2 c5 4.Ngf3 cxd4 5.Nxd4 Nf6 6.exd5 Qxd5 7.Nb5 Na6** See this month's game Vachier LeGrave-Caruana for. [Illingworth,Max, Kitty Kat]

In this game I'll take the opportunity to cover several QGA sidelines. C07: French Tarrasch: 3...c5, 4 Ngf3 and 4 exd5 Qxd5 **1.e4 e6 2.d4 d5 3.Nd2 c5 4.exd5 Qxd5 5.Ngf3 cxd4 6.Bc4 Qd7** I always assumed this was just worse than 6...a6, but my latest check hasn't brought up a clear route to an advantage for White. Particularly against players wanting to go for a risk-free edge with 6...a6 7.dxc5 or 7.b3, this could be a way to play for the win. **7.0-0** The vast majority play this or 7.Qe2, claiming the knight's placement on c6 makes it a lot harder for Black to get out of the way of the d5 break (as often happens in the ...a6 lines with ...b5/ ... Bb7/...Nbd7). White has compensation. **7...Nc6** While in theory Black would prefer 7...b5 in to 7...Nc6, it remains an idea and White struggles to set Black real challenges. **8.Nb3** In this version of the queenless middlegame, both sides placed their queen's knights suboptimally. **8...Nf6** As long-term subscribers may recall, my belief is that ...Bxc5 in reply to dxc5 offers Black slightly more winning chances than the ...Qxd1 lines - but both are acceptable. White has an edge. **9.Qe2 a6** At first I thought this might be less accurate, but I played out some sequences and found White's attempts to take the initiative didn't create long-term problems for Black. **10.a4 Be7** 0.42/21

C07: French Tarrasch: 3...c5, 4 Ngf3 and 4 exd5 Qxd5 This is the last and critical game of the tournament. Leading by one point ahead of Ivanchuk, I only needed a draw to become the champion, while my opponent had to win at all costs to win the tournament. **1.e4** Le,Quang Liem **1...e6!?** I rarely play the French Defence against 1.e4, but in this game I decided to surprise my experienced opponent. **2.d4 d5 3.Nd2 c5 4.exd5 Qxd5 5.Ngf3 cxd4 6.Bc4 Qd6 7.0-0 Nf6 8.Nb3 Nc6 9.Nbxd4 Nxd4 10.Nxd4 a6 11.Re1 Qc7** A well-known position from the Tarrasch variation, with hundreds of game having been played. **12.Qe2** A flexible developing

[12.Bb3 is the main line according to theory.]

12...Bd7N 0.50/20 An inaccuracy. In this line Black should perhaps opt for short castling. The reason is that with the bishop still on c4, White may sacrifice on a6 in some cases after Black castles long (see my notes below)

[Game 5 featured 4.Ngf3 cxd4 5.Nxd4 , here Topalov goes for the main alternative.]

4...Qxd5 Black doesn't want to defend an isolated queen's ♙ and strives for free development of his forces. This line was highly popular in the 1980s, although it lost most of its appeal towards the end of the 20-th century, when Black mostly turned to 3... ♘f6. Black's choice is still largely a matter of taste, the other main move

[4...exd5 is also far from refuted and objectively hardly any worse - Korchnoi used it successfully in his 1974 match against Karpov. 5.Ngf3 Nf6 6.Bb5+ Bd7 7.Bxd7+ Nbxd7 8.0-0 Be7 9.dxc5 Nxc5 10.Nb3 Nce4 11.Nfd4 Qd7 12.Qf3 g6 13.Bh6 Ng4 14.Bf4 0-0 15.h3 Ngf6 16.c3 Rfe8 17.Rfd1 Bd8 18.Nc2 Bb6 19.Nbd4 Re7 20.Ne3 Rae8 21.Ng4 Nxg4 22.hxg4 Qc8= 1/2 Topalov,V (2455)-Fries Nielsen,J (2415)/Copenhagen/1991/]

7...Nf6 8.Re1 This idea gained it's share of attention after Kasparov used it against Gelfand in Astana 2001.

[However, the main line is still 8.Nb3 Nc6 9.Nbxd4 Nxd4 10.Nxd4 and now Moskalenko advocates Petrosian's simple developing move Be7!? , which seems quite solid: *(10...a6* and*; 10...Bd7* occur far more often, but are perhaps no better. *)*

I've seen some comments on the forum that are of the notion that 9.Nf4 is practically a forced draw which is why 3...Nf6 teeters between dry equality and +=. Since ChessPub's last coverage, a couple of important theoretical games were played. Let's try and see if 9.Nf4 is really a forced draw. The main idea behind it is to wait and see how Black is going to develop, and then choose what to do as White. **6...Qd6 7.0-0!? Nf6 8.Nb3** The positional approach. **8...Nc6 9.Nbxd4 Nxd4 10.Nxd4 Be7 11.c3 0-0 12.Qf3 Qc7 13.Bb3** Normally these kind of positions are balanced, White has a nice control of the d5-square, but Black has the bishop pair and prospects to play ...f5. I think the main question is whether White can activate his b3-knight properly and be ready to fight against ...f5. I would slightly prefer White here. **13...a5 14.a4**
[14.Bg5]
14...Bd7 15.Bg5 Nd5 I like this concept, which is something I use a lot in my games - whenever my opponent has a bishop that I don't have anymore, I'm happy to place all my pieces on the opposite color (all white pieces are on light squares now!) and ideally many of my pawns on dark squares to limit that bishop, which is not that easy to do here (the chain b2-c3 is doing a good job, but g3-f4 is not easy to play and also risky).

And positionally White has a great position, because the central squares are blockaded (e4, d5), meanwhile Black's bishop on h6 is not doing much since we can always place all our pieces on light squares (♖d3, ♖fd1, etc).

The Final Throes It was left to the dependable John Emms, a rock of a player, to put the final knife into my ailing tournament. Disaster struck on the morning of the game when the battery on my mouse died, which meant I was unable to use the computer to prepare properly. To be honest this was something of a relief. Is there anything more boring in life than preparing with ChessBase? I made a joke during the event on Facebook, that I should create a tournament where preparation is banned. You have to get dependable people, people you can trust (sounds like a Tarantino film) to sign a contract agreeing not to do any preparation before the games. Someone pointed out that this would favour the professional players, who are in any case working on chess away from the tournament. I believe the key to the success of this strategy lies in whether White can carry out a successful attack on the Kingside as the blocked nature of the other parts of the board would mean that Black has less avenues to counterattack. In particular, subscribers might want to check, & further my analysis with 16. Rc1!? which feel is critical to the entire concept. Goh Wei Ming, Kevin:

D05: Colle System with ...e6 Wei Ming: 'I first came to know of 3...h6 against the Tarrasch while I was preparing a game for the National Championships in 2004. I was introduced to the variation by a friend of mine who showed me an article by Jeroen Bosch in his SOS column in NIC Magazine. 5 years have passed and nothing has risen to challenge the existence of this variation. I met Miklas Galyas while I was in Budapest in 2007 and he is easily one of the nicest players I've ever seen. However, he is not quite as nice over the board as we can see from the following game:' **1.e4 e6 2.d4 d5 3.Nd2 h6 4.Bd3 Nf6 5.Ngf3 c5 6.dxc5 Bxc5 7.Qe2 Nc6 8.c3 0-0 9.0-0 Qc7 10.b4N**
